EDUCATION

Ramkrishna Mahato Government Engineering College

B Tech - CGPA - 9.07

08 2019 – 07 2023

Purulia, India

PROJECTS

FULL STACK E-COMMERCE WEBSITE | React, MongoDB, Node.js, Express

Mar 2024 – Present

- Project Description: Developed a comprehensive e-commerce web application to provide a seamless online shopping experience.
- Key Features:
 - **User Authentication:** Implemented secure login and logout functionality to ensure user data protection.
 - **Product Management:** Developed features for product upload and modification, including an admin panel for efficient product management.
 - **Search and Filter:** Created robust search functionality and category-wise filtering to enhance user experience.
 - **Sorting:** Integrated sorting capabilities to allow users to sort products based on various criteria.
 - **Shopping Cart:** Built an intuitive add-to-cart feature to streamline the shopping process.
 - **Payment Gateway:** Implemented Stripe payment gateway for secure and reliable payment processing.
- Technologies Used: React, Mongoose, Node.js, Express, Tailwind CSS, JavaScript, Stripe

IDENTIFY COURSES Automation Framework | Hybrid Framework, Selenium, TestNG Jan 2024 – Mar 2024

- Developed an automation framework to validate courses and registration forms, ensuring platform reliability and functionality.
- Key Features:
 - **Logger, POM, and Test Reports:** Implemented logging, used Page Object Model for code reusability, and generated detailed test reports.
 - **Data-Driven Testing:** Used Data Provider for efficient validation of multiple test scenarios.
 - **Course Validation:** Automated validation of courses to ensure they meet specified criteria.
 - **Registration Form Validation:** Automated validation of registration forms for proper functionality and data handling.
 - **Hyperlink Validation:** Automated checking of hyperlinks to ensure they are functional and accurate.
- Technologies Used: Hybrid Framework, Selenium, TestNG, Data Provider

INTERNSHIP

Cognizant 

Intern

11 2023 – 03 2024

Pune, India

- About the role - Developed and executed Java Selenium automated test scripts, ensuring web application functionality and quality.
